

Project Status Report

Team name	E+1	
Review Date	2016.05.01	
Project Status	<ul style="list-style-type: none"> • Project Updates <ol style="list-style-type: none"> 1. Completed tasks <ul style="list-style-type: none"> - UC1 – UC5 (fully dressed version) - Domain modeling - SSD UC1 – UC5 2. Upcoming tasks <ul style="list-style-type: none"> - Operation contracts for all SSD's - Design model for all use cases - Design Class Diagram • Issues and Risks <p>Maybe there is a risk that we could start to late with the coding because of the long discussions about our way to find good definitions for our single topics in the Elaboration 1 phase</p> 	
Team Responsibility	Name	Responsibility
	Sebastian-David	UC1
	Kevin-Felix	UC2
	Tam	UC3
	Kay	UC4
	Lucy	UC5
Difficulties	Technical	Team work
	It is difficult to apply all the theoretical technics in the project. It would be nice to have more examples for the single topics of the inception and elaboration phases. Because as we already know, it's a very important aspect to have a good basic pattern.	Nothing special, everybody is working on his business in time.
Plan	<ul style="list-style-type: none"> - Finish our use case SSD's, Operation contracts, SD, GRASP.... - Work on our Elaboration 1 Presentation - Planning our next Elaboration
